**Explore Your Future Career Options and
Align Your Expectations with Reality at
Our Career Guidance Conference.**

**Network with Professionals from Various
Fields and Discover the Path to Your
Dream Job and Success!**

My Fellow Parents,

It gives us great pleasure to invite you to attend the **Malaysian Medical Association's Career Guidance Conference (MMA's CGC) 2026**. Over the years, we have realised through experience and feedback that the expectations of the current generation of our workforce are not aligned to the realities of work life. This predicament is not confined to the realms of the medical fraternity but rather cuts through all professions.

Therefore, we have for the third time, come up with this conference due to the overwhelming response and support we received previously (in Kuala Lumpur & Penang). This conference strives to address issues that many high school students have always wanted to know but have had challenges finding out.

The objectives of this event are:

- To bring about an awareness of the various career options available
- To collaborate with other professional organisations and give insight into real-life challenges of the various professions
- To align expectations and realities of working life in order to make informed choices
- To channel all profits earned towards an Education Fund in aid of student activities

We have invited prominent and experienced speakers to address the above issues during this conference. This event is free of cost for students (preferably 15 to 19 years of age) and their parents to attend. It is one of the many CSR projects undertaken by the MMA. We hope that you will join us and benefit from MMA's CGC.

Dr Sivabala Selvaratnam

Chairman, Organising Committee CGC 2026
